GOLDEN SAFFLOWER

See more birds. The key to attracting colorful birds to your backyard habitat is providing the proper food they desire. Most seed eating birds have specific preferences. The birds featured in the photos below like safflower. We are providing a more nutritious safflower for wild birds with Lyric Golden Safflower.

Lyric Golden Safflower is an organic, chemical-free hybrid safflower.

It has higher nutrition content than white safflower: 15% more oil, 25% higher protein, and 30% higher fat. This food has an extremely thin hull making it easier for birds to eat and digest. We are introducing Golden Safflower to bring your birds a new and improved food.

Lyric Golden Safflower will attract and feed these colorful songbirds:

Cardinals

Chickadees

Grosbeaks

Nuthatches

Towhees

Woodpeckers

AND MORE!

Keep the squirrels away! Squirrels typically do not like the taste of safflower. Using Lyric Golden Safflower provides the dual benefit of high nutrition for the birds and a taste that deters squirrels.

Is there a “best” feeder for Lyric Golden Safflower?

Songbirds the size of Cardinals prefer feeding on platforms or traditional hopper style feeders. Though these birds can master using tube style feeders, the perches on most tubes are intentionally made short to discourage use by larger birds. Therefore, we recommend a platform feeder or hopper style feeder. Placing the feeder in a relatively open area in the yard will increase the likelihood of visits from a wide variety of birds.
